

**SEN. BARROW'S STATEMENT
RE: PLANNED GEORGIA PACIFIC LAYOFFS**

01.10.19

“I am shocked and saddened by the news this morning that Georgia Pacific is planning to lay off more than 600 employees in March. I am in touch with state and local officials, union representatives and company officials to make sure that everything that can be done is done to provide the needed support for these workers and their families. It is my understanding that the company’s decision was based on declining demand for paper products, such as copy paper, etc. I know many of these families personally and we need to make sure that government and the community come together to help everyone move forward.”
