AMENDMENT NO. 6

On page 2, delete line 26 in its entirety and insert in lieu thereof the following:

"(b) Unless otherwise required by the U.S. Environmental Protection Agency, regulations authorized and adopted pursuant to the Clean Air Act Amendments of 1990, the regulations adopted pursuant to this Paragraph, at a minimum, shall provide for the following:

(i) A biennial emission inspection for vehicles that are registered or required to be registered in any affected parish that is classified as "serious" or worse on the ozone non-attainment list of the U.S. Environmental Protection Agency on January 1, 1998 for which a program emission inspection fee not to exceed ten dollars per vehicle inspected may be imposed if Intermodal Surface Transportation Efficiency Act funds are available for the purpose; otherwise and to the extent such funds are not available a fee not to exceed twenty dollars per vehicle inspected may be imposed. The secretary of the Department of Public Safety and Corrections may impose as an addition to the authorized annual fee provided for in R.S. 32:1301 et seq., a fee, the proceeds of which shall be deposited into the Environmental Trust Fund, for the exclusive use of an emission inspection program provided for in this Paragraph; such fee may be imposed commencing January 1, 1998, and which shall not exceed five dollars for the inspection of any vehicle registered in any affected parish. The additional annual fee authorized herein, and any other funds available for the purpose, shall be used to offset the program emission inspection fee and may be used to supplement the program emission inspection costs. However, to the extent that funds are available, from whatever source, in an amount sufficient for the program to operate without assessment of part or all of one or both of the fees authorized herein, such fees shall not be collected or, if being collected, shall be suspended until the continued collection is necessary.

(ii) To ensure the per vehicle fees imposed are no greater than the minimum amount necessary to fund the emission inspection program, the secretary and the secretary of the Department of Public Safety and Corrections shall each file an annual report with the legislative auditor prior to March first showing both actual and anticipated costs and revenues for the program.

(iii) Privately operated facilities employing tests designed to achieve federal performance standards. It is the goal of this Subparagraph that such facilities be located not more than fifteen miles driving distance from ninety percent of the affected

population's residences and designed to require a total maximum inspection and waiting time of not more than fifteen minutes.

(iv) On-road testing, which includes but is not limited to remote sensing in all affected parishes for all registered vehicles, with appropriate followup testing for failing vehicles. Such followup testing is to be conducted at an emission inspection facility and enforced by the possibility of registration suspension or denial. Followup testing shall be exempt from the maximum driving distance provision of this Paragraph. Consideration shall be given to the maximum extent appropriate, for the use of remote sensing and other available technology, as a method for selection of vehicles for followup testing at an emission inspection facility.

(v) The provisions of R.S. 30:2064 notwithstanding, a vehicle scrappage program, optional for the vehicle owner, designed to accelerate the removal and disposal of gross emitting vehicles that cannot be repaired within the repair cost limits set by the secretary or the value of which is exceeded by the cost for such repair. The implementation of such scrappage program shall coincide with that of the emission inspection program provided for in this Paragraph and shall be voluntarily funded by stationary source industries within the nonattainment area in exchange for emission reduction credits, banking, and trading criteria established by rules of the secretary to provide participation incentives to industries using a cost per ton formula. Other funding sources may be used for this program. Such rules shall be finally promulgated no later than September 1, 1994. In development of such scrappage program rules, the secretary shall make a reasonable effort to ensure that no affected resident will be denied basic transportation for employment purposes.

(vi) An educational program with criteria to certify highly trained and qualified repair mechanics, a repair mechanic training program sufficiently funded to permit the purchase of equivalent technology to that used at an emission inspection facility, and a system designed to reduce the public inconvenience of multiple retesting of repaired vehicles.

(vii) In determining the specific test technology to be implemented, the secretary shall preserve the state's options provided by federal law to vary from the specific program features required by EPA rules and to consider alternate, evolving, cost-effective technologies, presenting minimal public inconvenience, which are designed to bring Louisiana into compliance with federal ambient air quality standards and meet EPA required program elements. The secretary shall annually report to the presiding officers of each chamber of the Louisiana Legislature demonstrating the ongoing results of the program authorized by this Paragraph and shall include therein the results of its ongoing search for technology which may be employed to reduce ozone causing emissions.

(viii) The secretary shall hold at least one public meeting in each affected parish prior to the commencement of any testing to inform the residents of the affected parishes concerning the requirements of federal law and regulations, to increase citizen support for the program, to answer questions, and to gain insight into ways in which the program might be altered to be more effective and less intrusive; thereafter the secretary shall do so annually for the duration of the program to report on progress and address issues of interest to the public. In any parish in which emission inspections are conducted, the secretary shall hold such public meetings in each of the major municipalities of the parish.

(ix) At each inspection facility, notices shall be displayed in a place of prominence stating that the subject program, all inspections and funding provisions are expressly required by the U.S. Environmental Protection Agency and by an act of congress. Additionally, such notices shall be included on all cost- and fee-related transaction forms.

(x) No contract for the inspection of vehicles or for the distribution of equipment for the inspection of vehicles shall be executed by the department before January 1, 1998.

(xi) No vehicle shall be subject to an emissions inspection pursuant to this Subsection before January 1, 1999.

(c) The provisions of this Paragraph shall not apply to antique motor vehicles displaying special license plates as provided by R.S. 47:463.8.

(d)(i) To prepare and disseminate an annual ozone standard attainment monitoring report presenting data collected from monitors in all affected areas of the state.

(ii) The annual report shall be used by the department in its efforts to evaluate its existing and proposed programs, including for the inspection of motor vehicle emissions, if any, to achieve attainment of the National Ambient Air Quality Standard for ozone, and to provide summary information for the education of the public concerning progress toward achievement of said standard.

(iii) The report shall include summary information as follows: background information on the federal requirements for annual reporting; the types of data which must be reported; and the number of hours, days, monitors, and violations which are reflected by the data and reported to EPA for past, current, and future years. The report shall provide analysis of the data reflecting trends including decreases or increases over time and the patterns of monitoring site exceedances and total exceedances for the various areas where attainment has not been achieved fully.

(iv) The report should include any other data and information reasonably necessary to enhance the public's understanding of the ozone nonattainment data and report. The report should include tabular and chart formats to facilitate its use and understanding by the public.
