Much was accomplished in the 2013 Legislative Session, especially for the people of District 21.

A number of strides were made to help fund education, including \$69 million for local school districts, a 5% increase to the statewide scholarship program, and \$15.4 million for new facilities for the Young Memorial and River Parishes campuses for SCLTC and Fletcher Technical Community College.

The Legislature also passed a measure to create the Hospital Stabilization Fund to

preserve critical healthcare services subject to voter approval of a constitutional amendment.

The Legislature also enacted a number of bills that offer protections to District 21's residents and businesses. SB 6 gives further protections to shipyards by allowing for enhanced prosecution of those who trespass or steal from shipyards that conduct business on the water.

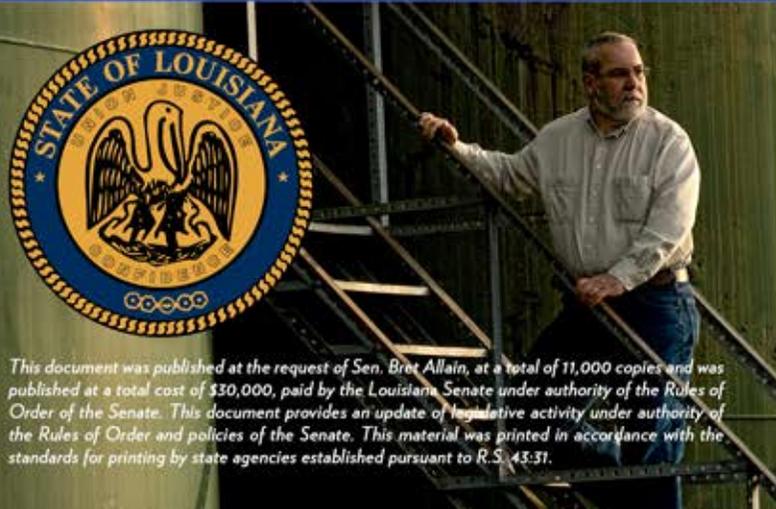

SB 20 requires 30-60 days public notice before a governmental body proposes tax issues.

SCR 91 recommends to the U.S. Congress that amendments be made to prevent dramatic rate hikes to the National Flood Insurance Program.

Other action by the Legislature provides for oversight hearings on Citizens' Insurance and protects the Artificial Reef Development Fund.

It continues to be my honor to serve as your Senator. Please let me know if there is anything I can do for you and your family.

*All the best,
SEN. BRET ALLAIN*
