Note: The above estimates are based on data from 2006-2016 Board of Commerce and Industry reports. All projects with advances cancelled or projects where the contract ended early are not included. In addition, depreciation multipliers were applied to the ten-year terms of each contract in order to provide an estimate of depreciation in assessed property values over time. Composite multipliers are from Louisiana Tax Commission table 2305.D. Dollar amounts represent 10-year exemption amounts approved by the Board at the start of the contract, adjusted for depreciation.
